

## Pulp Clamp

Pulp Clamps - There are several different forklift attachments which could be used to make forklifts way more helpful. Snowplow attachments can be mounted onto the front of a forklift. A scoop bucket could be useful when the job requires moving gravel, snow, sand, or soil. A double block handler permits the forklift operator to pick up 2 loads and afterward stack them beside each other. Several of these attachments are extremely excellent for light to medium duty work.

One of the lift truck accessories, called a package lift clamp, permits for the moving and carrying of really heavy pallets. Pallet crane forks are even utilized to transfer and carry pallets by using an overhead crane. A drum clamp attachment is helpful for transferring very heavy drums from place to place with out having to make use of a pallet. Forklift mounted hoppers permit material to be moved and dumped without having to do it manually. These hoppers when the bumper is released are self dumping.

There are even accessories accessible which could transform the forklift into a commercial broom or mop. Such accessories are perfect for cleaning boat docks, warehouse flooring and parking areas. Forklift mounted platforms come outfitted with dual entry doors and could be connected to be able to transport workers from one locale to another. The mounted platform attachment is nice for reaching places which are difficult to access, particularly when you've got merchandise or supplies stored in out of the way areas or really up high.

It is a versatile choice to put in lift truck attachments that could instantly transform a lift truck right into a mobile crane unit. This particular equipment is extremely useful with regards to transferring loads which may be uneven or difficult. This accessory can either be telescopic, mounted on the carriage itself, or be attached or lift truck mounted.
