

## Aerial Work Platforms

Aerial Work Platform - There are a variety of forklift accessories available on the market. They could help transform your forklift so that you can expand your ability to pick items up or accomplish clean up jobs and material handling with less effort.

Several of the accessories are particularly designed in order to fit on the forks themselves. Fork extensions for instance, are used if you require more blade length, which increases lifting capability. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another type utilized whenever transporting rolled material to be able to make sure it does not roll off of the standard flat blades.

Examples of lifting accessories consist of pivoting and telescoping crane or boom accessories. They could come in quite a few various styles and are usually intended for transporting poles, metal bars, lumber and various types of bulky items. Other attachments such as various styles of hook plates and hooks are available in order to pick up items with a chain or sling. Slab lifters and magnetic lifters are other stuff which can be utilized along with hook attachments. Slab lifters are specialized attachments that are intended for carrying different materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which connect to your lift truck in order to make transporting rolls of carpet much easier. The attachment hooks onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are several kinds of forklift accessory meant for facility maintenance such as snow blades. These industrial blades could be connected to front end loaders and utilized for moving materials like mulch, snow as well as dirt. Other popular cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the lift truck forks hook onto for sweeping large spaces like for instance parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up effortless and fast.

Material spreaders are other accessories used on lift trucks. These spreaders are handy for various applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment which lots of businesses make use of daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units existing that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform models have added space for workers so as to bring tools and other necessary items intended for the task. Usually work platforms are constructed of steel or ploy material.
